NPIP Certification Programs

Poultry Disease Information

The National Poultry Improvement Plan was established in the early 1930's to provide a cooperative industry, state, and federal program through which new diagnostic technology can be effectively applied to the improvement of poultry and poultry products throughout the country. The development of the NPIP was initiated to eliminate Pullorum Disease caused by Salmonella pullorum which was rampant in poultry and could cause upwards of 80% mortality in baby poultry. The program was later extended and refined to include testing and monitoring for Salmonella typhoid, Salmonella enteritidis, Mycoplasma gallisepticum, Mycoplasma synoviae, Mycoplasma meleagridis, and Avian Influenza. In addition, the NPIP currently includes commercial poultry, turkeys, waterfowl, exhibition poultry, backyard poultry, and game birds. The technical and management provisions of the NPIP have been developed jointly by Industry members and State and Federal officials. These criteria have established standards for the evaluation of poultry with respect to freedom from NPIP diseases.

APHIS' mission is to safeguard the health of our nation's agricultural resources. Our many animal health experts work closely with other federal agencies, states, foreign governments, industry and professional groups, and others to enhance international trade and cooperation while preventing the introduction of dangerous and costly pests and diseases.

Please find your state and contact the Official State Agent for information on becoming an NPIP participant.

Poultry Disease Information

The National Poultry Improvement Plan was established in the early 1930's to provide a cooperative industry, state, and federal program through which new diagnostic technology can be effectively applied to the improvement of poultry and poultry products throughout the country. The development of the NPIP was initiated to eliminate Pullorum Disease caused by *Salmonella pullorum* which was rampant in poultry and could cause upwards of 80% mortality in baby poultry. The program was later extended and refined to include testing and monitoring for *Salmonella typhoid*, *Salmonella enteritidis*, *Mycoplasma gallisepticum*, *Mycoplasma synoviae*, *Mycoplasma meleagridis*, and Avian Influenza. In addition, the NPIP currently includes commercial poultry, turkeys, waterfowl, exhibition poultry, backyard poultry, and game birds. The technical and management provisions of the NPIP have been developed jointly by Industry members and State and Federal officials. These criteria have established standards for the evaluation of poultry with respect to freedom from NPIP diseases.

APHIS' mission is to safeguard the health of our nation's agricultural resources. Our many animal health experts work closely with other federal agencies, states, foreign governments, industry and professional groups, and others to enhance international trade and cooperation while preventing the introduction of dangerous and costly pests and diseases.

Please find your state and contact the Official State Agent for information on becoming an NPIP participant.

State Import Requirements

- Has a drop down menu so you can choose
 - Requirements
 - Requirements and contact Numbers
 - **Best practice- advise participants to call state for current requirements**
- Updated whenever you notify us of changes
 - **Only as accurate as the information you provide**

¹ Or substitute certificate signed by Official State Agency or livestock sanitary official of State or origin.

² Or a statement from producer showing date of shipment, name and address of producer, quantity, breed, and pullorum-typhoid status.

³ All poultry, eggs(hatching), chicks, and poults must originate from Pullorum-Typhoid Clean flocks and be accompanied by a health certificate.

⁴ Approval or permit number required to ship into State.

⁵ VS Form 9-3 required for National Poultry Improvement Plan participants only.

⁶ Additional requirements for non-National Poultry Improvement Plan participants.

⁷ Wildlife.

⁸ All poultry, eggs(hatching), chicks, and poults must originate from a U.S. Avian Influenza Clean flock (chickens) or a U.S. H5/H7 Avian Influenza Clean flock (turkeys) and be accompanied by a health certificate.

⁹ Call State Dept. of Agriculture Animal Health Branch for detail on required avian entry permit in effect 6/19/2015.

¹⁰ Call for AI requirements prior to entry into state.

***Contact Official State Agency for additional requirements.

Disease Control Program	Flocks Tested			Flocks with Reactions			
	Number of Flocks	Number of Birds in Flocks	Number of Birds Tested	Number of Flocks	Number of Birds in Flocks	Number of Birds Tested	Number of Reactors
H5/H7 LPAI Monitored	<input type="text" value="0"/>	<input type="text" value="0"/>	<input type="text" value="0"/>	<input type="text" value="0"/>	<input type="text" value="0"/>	<input type="text" value="0"/>	<input type="text" value="0"/>

Section B-Flock Participation by Classes and Breeding Status
 Report in this section only the birds remaining in participating flocks after removal culls and reactors. The status of flocks as the "Primary" or "Multiplier" breeding should be defined in 9CFR 145.1(s) and (t) and reported on VS Form 9-2 or similar State from which is used for reporting flock selecting and blood testing

Disease Control Class and Breeding Status	Total Number of Flocks and Birds	
	Flocks	Birds
